Called to let me know she'll be providing a spreadsheet w/ changes/mods for POs - some of the
pricing we're using isn't the best pricing. They included GSA and Contract pricing and allowed
us to use whatever was "cheapest." We used contract pricing not knowing there were two price
lists. She calculates approximately in changes – credits.
is also working on one consolidated price list for the contract to avoid fut <u>ure confusion</u> .
She has suggested that we do a quote per order to ensure most up to date pricing sees this
as a potential administrative burden if pricing has already been established. $b^{6}_{b7c}$
b7E
also is under the impression that if the GSA contract pricing adjusts (something allowable
under the GSA Contract vehicle) we would be able to take advantage of lower prices or pay
more if prices went up informed her that that is NOT how FFP contracts work. Both parties will look into this before making final determinations needs to discuss w/ OGC the
feasibility of having "2 contracts" under one and the ability to change pricing mid stream like
that on an FFP contract.
noted that each cost proposal on the TOs had lengthily conditions and assumptions
said these were inserted per the original contract. Reference 2.6 is from the original SOW for the
contract.
