

# How will ATR be displayed?

Operators are presented with a display that allows for the selection of male (blue) /female (pink) passenger screening

Separate ATR detection algorithms are used to reduce false alarms based on the passenger's gender

If anomalies are discovered, a screen will signify specific location(s) on the passenger where anomalies ARE detected. Image is the same regardless of gender.

(b)(3), 49 USC 114(r)

If no anomalies are discovered, a screen will appear signifying that anomalies are NOT detected.

## SENSITIVE SECURITY INFORMATION

WARNING: This record contains Sensitive Security Information that is controlled under 49 CFR parts 15 and 1520. No part of this record may be disclosed to persons without a "need to know", as defined in 49 CFR parts 15 and 1520, except with the written permission of the Administrator of the Transportation Security Administration or the Secretary of Transportation. Unauthorized release may result in civil penalty or other action. For U.S. government agencies, public disclosure is governed by 5 U.S.C. 552 and 49 CFR parts 15 and 1520.
