FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: ELSUR

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

Whether or not a PIA is required, the system owner/program manager should consult with the FBI Records Management Division (RMD) to identify and resolve any records issues relating to information in the system.

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:

1. Type of information in the system:

   ELSUR contains the names of all persons, businesses, organizations, locations and facilities for which electronic surveillance has been sought or administered by the FBI in a court order.

   ELSUR also contains the true name or best known name of all persons, businesses and organizations who have been a party to a communication intercepted by the FBI as authorized by a court order or via consensual monitoring.

   a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information.

2. Purpose for collecting the information and how it will be used:

   Primary Purpose: For reporting by the Declarant to the Judge (Title III or FISA cases) whether any subject(s) for which the FBI is requesting authorization to conduct electronic surveillance has ever been surveilled before and, if so, when.

   Secondary Purposes: Unknown - check with the ELSUR Operations Unit (EOU).

3. The system's structure (including components/subsystems):

4. Means of accessing the system and transmitting information to and from the system:

   Records are keyed by hand or uploaded electronically into ELSUR. Records are queried online and printed in reports.

FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: ELSUR

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

ELSUR Operations Technicians (EOTs), EOT Supervisors, Management & Program Analysts assigned to the ELSUR Operations Unit, and programmers in HQISDU assigned to the ELSUR application; around in all.

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Nobody outside the FBI will have direct access to this information, however reports generated by EOTs are provided to Case Agents. Additionally, the Declarant (mentioned above) may provide information of some type to the Judge, which may or may not come directly from the ELSUR application. Check with EOU for more details.
