After all division approvals, forward signed hard copy plus electronic copy to FBI OGC/PCLU (JEH 7350).  
(The FBI Privacy and Civil Liberties Officer's determinations, conditions, and/or final approval will be recorded on the following page.)
UNCLASSIFIED//FOR OFFICIAL USE ONLY

FINAL FBI APPROVAL / DETERMINATIONS / CONDITIONS:

___ PIA is required by the E-Government Act.
___ PIA is to be completed as a matter of FBI/DOJ discretion.

Is PIA to be published on FBI.GOV (after any RMD FOIA reductions)? ___ Yes. ___ No (indicate reason):

X PIA is not required for the following reason(s):
___ System does not collect, maintain, or disseminate PII.
___ System is grandfathered (in existence before 4/17/2003; no later changes posing significant privacy risks).
___ Information in the system relates to internal government operations.
___ System has been previously assessed under an evaluation similar to a PIA.
___ No significant privacy issues (or privacy issues are unchanged).
X Other: The IPR Center SharePoint site is not an FBI information technology (IT) asset. See comments section below.

Notify FBI RMD/RIDS per MIIG 190.2-3? ___ No ___ Yes--See sample EC on PCLU intranet website here:
http://home/DO/OGC/LTB/PCLU/PrivacyCivil%20Liberties%20Library/form_for_mig190-2-3_ec.wpd

SORN/SORN revision(s) required? ___ No ___ Yes (indicate revisions needed):

Prepare/revise/add Privacy Act (e)(3) statements for related forms? ___ No ___ Yes (indicate forms affected):

RECORDS: The program should consult with RMD to identify/resolve any Federal records/electronic records issues. The system may contain Federal records whether or not it contains Privacy Act requests and, in any event, a records schedule approved by the National Archives and Records Administration is necessary. RMD can provide advice on this as well as on compliance with requirements for Electronic Recordkeeping Certification and any necessary updates.

UNCLASSIFIED//FOR OFFICIAL USE ONLY
I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: (a) name of the system/project, including associated acronyms; (b) structure of the system/project, including interconnections with other projects or systems; (c) purpose of the system/project; (d) nature of the information in the system/project and how it will be used; (e) who will have access to the information in the system/project; (f) and the manner of transmission to all users.

Established in 1999, the mission of the National Intellectual Property Rights Coordination Center (the IPR Center) is to ensure national security by protecting the public's health and safety, the U.S. economy, and to stop predatory and unfair trade practices that threaten the global economy. Restructured in July, 2008, the IPR Center now brings together more than twenty investigative agencies involved in the federal enforcement of intellectual property (IP) laws in a task force setting. Partner agencies include the FBI, U.S. Immigration and Customs Enforcement (ICE), U.S. Customs and Border Protection, the U.S. Postal Inspection Service, the U.S. Patent and Trademark Office, the Nuclear Regulatory Commission, along with other investigative and regulatory agencies.

Individuals and entities wishing to report a possible IP crime may do so by filing an online complaint at www.iprcener.gov, by calling the IPR Center Tip Line, by emailing iprcenter@dhs.gov, or by contacting one of the Center's partner agencies.
2. Does the system/project collect, maintain, or disseminate any information about individuals (i.e., a human being or natural person, regardless of nationality)?

_____ NO [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

_____ YES [If yes, please continue.]

3. Please indicate if any of the following characteristics apply to the information in the system about individuals: Bear in mind that log-on information may identify or be linkable to an individual.
(Check all that apply.)

_____ The information directly identifies specific individuals.

_____ The information is intended to be used, in conjunction with other data elements, to indirectly identify specific individuals.

_____ The information can be used to distinguish or trace an individual's identity (i.e., it is linked or linkable to specific individuals).

If you marked any of the above, proceed to Question 4.
4. Does the system/project pertain only to government employees, contractors, or consultants?

   ____ NO  ____ YES

5. Is information about United States citizens or lawfully admitted permanent resident aliens retrieved from the system/project by name or other personal identifier?

   ____ NO. [If no, skip to question 7.]
   ____ YES. [If yes, proceed to the next question.]

6. Does the system/project collect any information directly from the person who is the subject of the information?

   ____ NO  [If no, proceed to question 7.]
   ____ YES

   a. Does the system/project support criminal, CT, or FCI investigations or assessments?

      ____ NO

      ____ YES  [If yes, proceed to question 7.]

   b. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

      ____ NO  [The program will need to work with PCLU to develop/implement the necessary form(s).]

      ____ YES  Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the system/project? Full SSNs should only be used as identifiers in limited instances.
NO  YES  If yes, check all that apply:

SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

SSNs are necessary to identify FBI personnel in this internal administrative system.

SSNs are important for other reasons. Describe:

The system/project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users). Describe:

It is not feasible for the system/project to provide special protection to SSNs. Explain:

Is the system operated by a contractor?

No.

Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be imposed as a matter of Department of Justice policy. Consultations with the Office of the General Counsel may be required if a contractor is operating the system for the FBI.

Has the system undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

NO  If no, indicate reason; if C&A is pending, provide anticipated completion date:

YES  If yes, please indicate the following, if known:

Provide date of last C&A certification/re-certification:

Confidentiality:  Low  Moderate  High  Undefined

Integrity:  Low  Moderate  High  Undefined

Availability:  Low  Moderate  High  Undefined
UNCLASSIFIED//FOR OFFICIAL USE ONLY

_____ Not applicable – this system is only paper-based.

_____ NO

_____ YES If yes, please describe the data mining function:

11. Is this a national security system (as determined by the SecD)?

_____ NO

_____ YES

12. Status of System/Project:

_____ This is a new system/project in development. [If you checked this block, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

II. EXISTING SYSTEMS / PROJECTS

1. When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

_____ NO [If no, proceed to next question (II.3).]

_____ YES If yes, indicate which of the following changes were involved (mark all changes that apply, and provide brief explanation for each marked change):

_____ A conversion from paper-based records to an electronic system.

_____ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

_____ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

_____ A change that results in information in identifiable form being merged, centralized, or matched with other databases.
A new method of authenticating the use of and access to information in identifiable form by members of the public.

A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.

A change that results in a new use or disclosure of information in identifiable form.

A change that results in new items of information in identifiable form being added into the system/project.

Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

Other [Provide brief explanation]:

3. Does a PIA for this system/project already exist?

   ____ NO   ____ YES

   If yes:

   a. Provide date/title of the PIA:

   b. Has the system/project undergone any significant changes since the PIA?

      ____ NO   ____ YES

   [The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]

After all division approvals, forward signed hard copy plus electronic copy to FBI OGC/PCLU (JEH 7350). (The FBI Privacy and Civil Liberties Officer’s determinations, conditions, and/or final approval will be recorded on the following page.)
### FINAL FBI APPROVAL / DETERMINATIONS / CONDITIONS

- **PIA is required by the E-Government Act.**
- **PIA is to be completed as a matter of FBI/DOJ discretion.**

Is PIA to be published on FBI.GOV (after any RMD FOIA redactions)?

- [ ] Yes
- [x] No (indicate reason):
  - The contents of the **[redacted]** PIA will be classified; it is therefore not feasible to publish the PIA.

- **PIA is not required for the following reason(s):**
  - [ ] System does not collect, maintain, or disseminate PII.
  - [ ] System is grandfathered (in existence before 4/17/2003; no later changes posing significant privacy risks).
  - [ ] Information in the system relates to internal government operations.
  - [ ] System has been previously assessed under an evaluation similar to a PIA.
  - [ ] No significant privacy issues (or privacy issues are unchanged).
  - [ ] Other (describe):

---

**Applicable SORN(s):**

- **Central Records System (CRS), Justice/FBI-002**

Notify FBI RMD/RIDS per M1OG 190.2.3?

- [ ] No
- [x] Yes—See sample EC on PCLU intranet website here: [http://home/DO/OGC/LTB/PCLU/PrivacyCivil%20Liberties%20Library/form_for_m1og190-2-3_ec.wpd](http://home/DO/OGC/LTB/PCLU/PrivacyCivil%20Liberties%20Library/form_for_m1og190-2-3_ec.wpd)

SORN/SORN revision(s) required?

- [x] No
- [ ] Yes (indicate revisions needed):

Prepare/revise/add Privacy Act (e)(3) statements for related forms?

- [ ] No
- [ ] Yes (indicate forms affected):

**RECORDS.** The program should consult with RMD to identify/resolve any Federal records/electronic records issues. The system may contain Federal records whether or not it contains Privacy Act requests and, in any event, a records schedule approved by the National Archives and Records Administration is necessary. RMD can provide advice on this as well as on compliance with requirements for Electronic Recordkeeping Certification and any necessary updates.

**Other:**

Acting Deputy General Counsel and  
FBI Privacy and Civil Liberties Officer  

**Signature:** /s/  
**Date Signed:** 1/11/2011  

**SECRET/NF**
1. INFORMATION ABOUT THE SYSTEM PROJECT

1. Provide a general description of the system or project that includes:
   (a) name of the system/project; (b) purpose of the system/project; (c) structure of the system/project; including associated systems; (d) interconnections with other projects or systems; (e) nature of the information in the system/project; (f) who will have access to the information in the system/project; and how it will be used; (g) the manner of transmission to all users.
2. Does the system/project collect, maintain, or disseminate any information about individuals (i.e., a human being or natural person, regardless of nationality)?

_____ NO

X YES
3. Please indicate if any of the following characteristics apply to the information in the
system about individuals: Bear in mind that log-on information may identify or be
linkable to an individual.
(Paragraph continues)

X The information directly identifies specific individuals.

... The information is intended to be used, in conjunction with other data
elements, to indirectly identify specific individuals.

... The information can be used to distinguish or trace an individual's identity (i.e., it
is linked or linkable to specific individuals).

... None of the above. If none of the above, describe why the information does not
identify specific individuals either directly or indirectly.

4. Does the project pertain only to government employees, contractors, or consultants?

... NO      X YES

5. Is information about United States citizens or lawfully admitted permanent resident
aliens retrieved from the project by name or other personal identifier?

... NO.

X YES.

6. Does the project collect any information directly from the person who is the subject
of the information?

X NO

... YES

The FBI does not collect information as part of [paragraph continues]...

[Paragraph continues]

a. Does the project support criminal, CT, or FCI investigations or assessments?

... NO

X YES  [If yes, proceed to question 7.]
h. Are subjects of information from whom the information is directly collected provided a written Privacy Act (e)(3) statement (either on the collection form or via a separate notice)?

_____ NO [The program will need to work with PCLU to develop/implement the necessary form(s).]

_____ YES Identify any forms, paper or electronic, used to request such information from the information subject:

7. Are Social Security Numbers (SSNs) collected, maintained or disseminated from the project? Full SSNs should only be used as identifiers in limited instances.

_____ NO    _____ YES

____ X. SSNs are necessary to establish/confirm the identity of subjects, victims, witnesses or sources in this law enforcement or intelligence activity.

_____ SSNs are necessary to identify FBI personnel in this internal administrative system.

_____ X. SSNs are important for other reasons.

_____ X. The project provides special protection to SSNs (e.g., SSNs are encrypted, hidden from all users via a look-up table, or only available to certain users).

Describe:

It is not feasible for the system/project to provide special protection to SSNs. Explain:

8. Is the project operated by a contractor?

_____ X. No.

_____ Yes. Information systems operated by contractors for the FBI may be considered Privacy Act systems of records. The Federal Acquisition Regulation contains standard contract clauses that must be included in the event the system collects, maintains or disseminates PII and additional requirements may be
imposed as a matter of Department of Justice policy. Consultations with the Office of the General Counsel may be required if a contractor is operating the system for the FBI.

9. Has the project undergone Certification & Accreditation (C&A) by the FBI Security Division (SecD)?

   ___ NO  If no, indicate reason; if C&A is pending, provide anticipated completion date:

   ___ X  YES  If yes, please indicate the following, if known:

   Confidentiality:  ___ Low  ___ Moderate  ___ X High  ___ Undefined

   Integrity:  ___ Low  ___ Moderate  ___ X High  ___ Undefined

   Availability:  ___ Low  ___ Moderate  ___ X High  ___ Undefined

   ___ Not applicable – this system is only paper-based.

10. Is this project the subject of an OMB-300 budget submission?

    ___ X  NO

    ___ YES  If yes, please provide the date and name or title of the OMB submission:

    ___ NO

    ___ X  YES  If yes, please describe the data mining function:
12. Is this a national security system (as determined by the SecD)?

    _NO_   _X_ YES

13. Status of Project:

    _X_ This is a new project in development.

    _X_ EXISTING SYSTEMS / PROJECTS

    When was the system/project developed?

2. Has the system/project undergone any significant changes since April 17, 2003?

    _NO_ [If no, proceed to next question (II.3).]

    _YES_ If yes, indicate which of the following changes were involved (mark all changes that apply, and provide brief explanation for each marked change):

    _X_ A conversion from paper-based records to an electronic system.

    _X_ A change from information in a format that is anonymous or non-identifiable to a format that is identifiable to particular individuals.

    _X_ A new use of an IT system/project, including application of a new technology, that changes how information in identifiable form is managed. (For example, a change that would create a more open environment and/or avenue for exposure of data that previously did not exist.)

    _X_ A change that results in information in identifiable form being merged, centralized, or matched with other databases.

    _X_ A new method of authenticating the use of and access to information in identifiable form by members of the public.

    _X_ A systematic incorporation of databases of information in identifiable form purchased or obtained from commercial or public sources.

    _X_ A new interagency use or shared agency function that results in new uses or exchanges of information in identifiable form.
A change that results in a new use or disclosure of information in identifiable form.

A change that results in new items of information in identifiable form being added into the system/project.

Changes do not involve a change in the type of records maintained, the individuals on whom records are maintained, or the use or dissemination of information from the system/project.

Other [Provide brief explanation]:

3. Does a PIA for this system/project already exist?

_____ NO  _____ YES

If yes:

a. Provide date/title of the PIA:

b. Has the system/project undergone any significant changes since the PIA?

_____ NO  _____ YES

[The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval and determination if PIA and/or other actions are required.]
This checklist is based on the FBI Privacy Impact Assessment (PIA) for FBI Routine Databases of 4/7/08 as approved 8/29/08 (190-HQ-C1321794 Serial 432, 9/8/08). In accordance with the PIA, this checklist may be used in lieu of any additional PIA (or PTA), so long as every one of the twelve blocks below can be checked. This checklist should be completed by the database manager (or other appropriate official/ as determined by the division) and approved by the Division Privacy Officer.

A. Provide date checklist prepared: March 29, 2011

B. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users.

- [ ] Is installed on individual central processing units (CPUs) and operates on the Secret Enclave.
does not contain the actual names of individual users or specific personal identifiers. It
does, however, contain limited personally identifiable information (PII) consisting of user
names, IP addresses and inventory property numbers of CPUs

resides on the Secret Enclave and is presently undergoing certification
and accreditation.

C. Complete checklist (all must be checked as being accurate for this
database/application):

X 1. Information in the system identifies individuals, either directly or
   indirectly. An individual can be identified indirectly through a combination of
descriptors such as gender, race, birth data, geographic indicator, license number,
or license plate number.1

X 2. The system derives information from FBI records covered by existing Privacy
   Act system of records notices (http://foia.fbi.gov/rec_sys.htm) regardless of
   format in which those records are maintained and/or from information that is
   publicly available at no cost. (If information comes from FBI records that are not
   covered by existing systems of records notices, contact the PCLU.)

X 3. Neither commercial data nor paid subscription service data is included in the
database unless that information is derived from existing FBI records.

X 4. The system can be accessed only by members of a particular office, unit, squad
   or other similar FBI entity and sharing of information is based strictly on an
   operational need to know.

X 5. The system is not used for purposes of pattern-based data mining.

X 6. Initial and continued access to the system is subject to permission controls
   enforced by FBI supervisory personnel, including the use of access passwords.

X 7. Access to the system can be audited.

X 8. The system is part of an established platform on which a Security Certification
   and Accreditation has been performed.

X 9. The system was developed after April 17, 2003. 2

X 10. If the system maintains information about U.S. citizens or legal permanent
    residents, it is covered by a published Privacy Act System of Records Notice.

---

1 Systems that do not contain any personally identifiable information need not complete this checklist.
2 Systems developed before April 17, 2003, and not modified since then, are not required to conduct a
   PIA until a modification occurs that would change the privacy risks to information in the system.

UNCLASSIFIED//FOR OFFICIAL USE ONLY
11. Records retention issues have been discussed with the Records Management Division.

12. Any personally identifiable information placed on a mobile device or on media that is transported outside FBI facilities must comply with the FBI policy on encryption and must be password protected.

D. If a database contains information that may be considered sensitive/controversial or is maintained as part of a larger FBI program, the database administrator or program manager (or division privacy officer) must consult with the FBI’s Office of the General Counsel, Privacy and Civil Liberties Unit about the potential need to assess the privacy risks in a separate PIA.

E. File Notes (summarize any additional information that may be warranted for record purposes, e.g., coordination with OGC, etc.):

FBI PRIVACY THRESHOLD ANALYSIS (PTA)
NAME OF SYSTEM: ____________  b7E

A. General System Description:

1. Type of information in the system:

   a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

      The ___ is a General Support System that consists of the ___ needed to operate some of the FBI's ___ The ___ does not capture any data but rather provides ___ necessary to ___ to the FBI user community. Each ___ will provide its own PTA/PTA. The attached document ___ contains the list of ___ The ___ is the replacement for the ___

2. Purpose for collecting the information and how it will be used:

      ___ will capture logs of events for each ___ These logs are available to the ___ support teams to assist in identifying bugs in ___ No ___ data is kept as part of the logs.

3. The system's structure (including components/subsystems):

      The ___ will consist of ___ that are scheduled for implementation are ___

4. Means of accessing the system and transmitting information to and from the system:

      Most ___ will have a link off the FBI Homepage (listed under ___) but it is not a requirement. All ___ utilize the Internet Explorer browser to present the ___ to the users. All ___ are now required to utilize the ___ to hide and secure the login passwords. ___ is utilized and all ___ will use the ___

5. Who within FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

      This is based on the ___ used for data access. ___
FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: ____________________________

There is a very finite set of System Administrators who have access to the ____________________________

An even smaller set of Administrators would have access to the ____________________________

All user activity is logged ____________________________

6. Who outside the FBI will have access to the information in the system and controls for ensuring that only authorized persons can access the information:

Absolutely no one outside the FBI will have direct access to the information in the ____________________________

Should the need arise and proper justification is submitted, reports from the ____________________________

may be produced and turned over ____________________________

7. Has this system been certified and accredited by the FBI Security Divisions? __Yes ___X__No

The ____________________________ received an ATO on 07/17/2007.

The ____________________________ are targeted for ATO testing in September 2008. ____________________________

8. Is this system encompassed within an OMB-300? __Yes ___X__No ___Don't Know

(If yes, please attach copy of latest one.)

1. Was the system developed prior to April 17, 2003?

___ YES (If “yes,” proceed to Question 1.)

___X__NO (If “no,” proceed to Section II.)

1. Has the system undergone any significant changes since April 17, 2003?

___YES If “yes,” please explain the nature of those changes:

(Continue to Question 2.)

___NO (If “no,” the PTA is complete and should be sent to FBI OGC’s Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ’s Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

2. Do the changes involve the collection, maintenance, or dissemination of information in identifiable form about individuals?

___YES (If “yes,” please proceed to Question 3.)

___NO (If “no,” the PTA is complete and should be sent to FBI OGC’s Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ’s Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

___YES If “yes,” is this a Major Information System (as listed on OGC’s FBINET website)?:
FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: ____________________________

___ Yes. (If "yes," a full PIA is required. PTA is complete.)

___ No. (If "no," the PTA is complete and should be sent to FBI OGC’s Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ’s Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

___ NO (If “no,” go to section III to determine if a full or short-form PIA is required.)

II. For systems developed after April 17, 2003.

1. What is the purpose of the system? (Answer in detail unless details already provided in A. 2 above):
   To provide the ____________________________ necessary to support ____________________________
   To provide the ____________________________ necessary to support the ____________________________

   (Continue to Question 2.)

2. Does the system collect, maintain or disseminate information in identifiable form about individuals?

___ YES (If “yes,” please proceed to Question 3.)

___ NO (If “no,” the PTA is complete and should be sent to FBI OGC’s Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ’s Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required.)

3. Is the system solely related to internal government operations?

___ YES If "yes," is this a Major Information System (as listed on OGC’s FBINET website)?:

   ___ Yes. (If "yes," a full PIA is required. PTA is complete.)

   ___ No. (If "no," the PTA is complete and should be sent to FBI OGC’s Privacy and Civil Liberties Unit (PCLU) for review, approval, and forwarding to DOJ’s Privacy and Civil Liberties Office. Unless you are otherwise advised, no PIA is required. (FBI and DOJ reviewing officials reserve the right to require a PIA.))

   ___ NO (If "no," go to section III to determine if a full or short-form PIA is required.)

III. Full or Short-Form PIA

1. Is the system a major information system (as listed on OGC’s FBINET website)?

___ YES (If "yes," a full PIA is required. PTA is complete.)

___ NO (If "no," please continue to question 2.)

I. INFORMATION ABOUT THE SYSTEM / PROJECT

1. Provide a general description of the system or project that includes: name of the system/project, including associated acronyms; structure of the system/project, purpose; nature of the information in the system and how it will be used; who will have access to the information in the system and the manner of transmission to all users. (This kind of information may be available in the System Security Plan, if available, or from a Concept of Operations document, and can be cut and pasted here.)

This project involves a proposed technical upgrade to the Automated Fingerprint Identification System (AFIS) which is used to process fingerprint submissions that have been provided to the Criminal Justice Information Services (CJIS) Division for authorized national security, criminal, and civil purposes. This upgrade will increase the AFIS' processing capacity and processing speed to provide the CJIS Division with the interim technical capacity to timely process the ever increasing number of fingerprint submissions, which is a critical part of CJIS Division's mission. Increased capacity issues will be more thoroughly addressed during the acquisition of Next Generation Identification (NGI) technology; in the meantime, this interim solution will permit the FBI to meet its current mission needs.

As background, the FBI maintains an automated database that integrates criminal history records including arrest information and corresponding disposition information, submitted by Federal, State, local, tribal, and certain foreign criminal justice agencies. Currently, the FBI maintains criminal history records on more than 56 million different individuals, with many of the individuals having multiple entries of separate encounters with the criminal justice system. These records are searchable for various established purposes, and the preliminary electronic search is performed by the FBI's Integrated Automated Fingerprint Identification System (IAFIS).

The AFIS Segment of IAFIS began to experience performance and daily throughput capacity issues in January 2008 due to a significant increase in electronic submissions. It has become clear that to address these performance issues, the IAFIS needs to be technically upgraded or enhanced to ensure current criminal and civil fingerprint processing will not be negatively impacted. The current system architecture is based on limited with this configuration, however, upgrade capabilities are configuration currently deployed is no longer

---

1 The FBI has established the Fingerprint Identification Record System (FIRS) (Justice/FBI-009) as a Privacy Act system of records to support identification and criminal history record information functions for local, state, tribal, and federal criminal justice agencies, and for noncriminal justice agencies and other entities where authorized by federal statute, statute pursuant to Public Law 92-544, Presidential executive order, or regulation or order of the Attorney General of the United States. (See 28 CFR 20.31; 64 FR 52343, 52347.) IAFIS is a component of the FIRS, providing an automated fingerprint search capability, latent fingerprint search capability, electronic image storage, and electronic exchange of fingerprints and responses 24/7. AFIS is in turn the component of IAFIS which actually processes the automated fingerprint comparisons conducted by IAFIS.

2 The CJIS Division processed approximately 35.5 million fingerprint submissions during Fiscal Year 2008, and FY 2009 is expected to be millions higher.
available for purchase and a new upgrade solution is required. It is imperative that the CJIS Division maintain the capability to process fingerprint submissions efficiently, and merely adding new and using existing technology does not provide a reasonable solution.

CJIS Division has determined that there is an interim solution available that will meet the requirement for additional processing capacity. This solution involves the reutilization of several AFIS and the purchase of several AFIS. This interim solution will be superseded upon receipt for deliverables from the Next Generation Identification (NGI) project; however, this long-term solution will not be available for approximately 30 months.

The proposed solution is based on technology and is expected to be easily expandable for expected workloads through Calendar Year 2012. technology is an In effect, this technology is faster and cheaper than what is currently being utilized. This new technology is needed because the current Operational Environment (OE) is exceeding its design capacity and the has been successfully proven. technology has completed a proof-of-concept (POC) comparison, and an AFIS rapid prototype with full functionality and with required performance capability is scheduled to be built as the first stage of the project. This will migrate the current AFIS application from its current to the proposed new

This initiative does not contemplate changes to the AFIS interfaces or functionality. Likewise, the upgrade will not influence the submission or retention of criminal and civil fingerprints, other than increasing processing capacity.

2. Does the system/project collect, maintain, or disseminate any information about individuals in identifiable form, i.e., is information linked to or linkable to specific individuals (which is the definition of personally identifiable information (PII))?

NO. [If no, STOP. The PTA is now complete and after division approval(s) should be submitted to FBI OGC/PCLU for final FBI approval. Unless you are otherwise advised, no PIA is required.]

The underlying IAFIS system does contain fingerprints and PII. IAFIS has been in existence since well before April 17, 2003, and although there have been privacy-significant changes to IAFIS since then, such changes have been addressed in separate PTAs and PIAs. See, e.g., PIA dated June 8, 2008, for the Next Generation Identification-Interstate Photo System; and PIA dated May 4, 2008, for the Outsourcing of Noncriminal Justice Purposes. This initiative is merely a project to provide additional processing capacity by upgrading system hardware and does not itself pertain to maintenance, collection, or dissemination of the PII in the underlying system. This initiative does not affect the number of authorized recipients; does not affect the categories of individuals for whom personally identifiable information is processed or retained; and does not affect the types of information that is being disseminated.

Privacy Threshold Analysis

For efficiency, a system owner or program manager can be aided in making the determination of whether a PIA is required by conducting and following Privacy Threshold Analysis (PTA).

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

1. Was the system developed prior to April 17, 2003?

   □ YES

   □ NO

   (If the answer is "yes" proceed to Question 1.)

   (If the answer is "no", proceed to Section II.)

1. Has the system undergone any significant changes\(^1\) since April 17, 2003?

   □ YES

   □ NO

---

\(^{1}\) "Significant Changes" are defined as changes which create new privacy risks, such as, converting paper-based records to electronic systems; changing anonymous information into information in identifiable form; new uses of an IT system, including application of new technologies, significantly change how information in identifiable form is managed in the system; merging, centralizing, or matching databases that contain information in identifiable form with other databases; or otherwise significantly manipulating such databases; newly applying any user-authenticating technology to an electronic information system that is accessed by members of the public; systematically incorporating into existing information systems databases of information in identifiable form that are purchased or obtained from commercial or public sources; working with another agency or agencies on shared functions that involving significant new interagency uses or exchanges of information in identifiable form; altering a business process that results in significant new uses or disclosures of information or the incorporation into the system or addition items of information in identifiable form; or adding new information in identifiable form, the character of which raises the risks to personal privacy (for example, adding health or financial information).

Room Number: 7338

FBI DIVISION APPROVALS. A PIA (and/or PTA) should be prepared/approved by the cognizant program management in collaboration with IT, security, and end-user management and OGC/PCLU. (PIAs/PTAs relating to electronic forms/questionnaires implicating the Paperwork Reduction Act should also be coordinated with the RMO Forms Desk.) If the subject of a PTA/PIA is under the program cognizance of an FBIHQ Division, prior to forwarding to OGC the PTA/PIA must also be referred to the FBIHQ Division for program review and approval, if required by the FBIHQ Division.

FBI PRIVACY THRESHOLD ANALYSIS (PTA)  

NAME OF SYSTEM: Law Enforcement Officers Killed and Assaulted

For efficiency, a system owner or program manager can be aided in making the determination of whether a Privacy Impact Assessment (PIA) is required by conducting and following Privacy Threshold Analysis (PTA).

Whether or not a PIA is required, the system owner/program manager should consult with the FBI Records Management Division (RMD) to identify and resolve any records issues relating to information in the system.

A PTA contains basic questions about the nature of the system in addition to a basic system description. The questions are as follows:

A. General System Description: Please briefly describe:

1. Type of information in the system:

   In the instance of a line-of-duty officer death, the case agent from the jurisdictional FBI field office sends a notification EC to the FBI’s LEOKA program. Within this EC, details include the description of the circumstances surrounding the death; victim officer’s name, rank, date of birth, and law enforcement experience; offender’s name, age, and current status, such as deceased, at large, or arrested and charged; and survivor information, such as names, ages, addresses, and relationships to the victim officer. In addition, the LEOKA program is notified of officer assaults involving injury with firearms or knives/other cutting instruments by the monthly UCR collection. This monthly collection is aggregate totals only and does not include any personal information.

   In response to both notifications, the LEOKA program’s staff requests that the victim officer’s employing agency complete Form 1-701, “Analysis of Law Enforcement Officers Killed and Assaulted,” to obtain additional details concerning the circumstances surrounding the incident. For line-of-duty deaths, Form 1-701 is provided to the victim officer’s employing agency via the case agent from the jurisdictional FBI field office, and for officer assault incidents, Form 1-701 is provided to the victim officer’s employing agency via the State Program or directly by the LEOKA program’s staff. Form 1-701 is used to collect the victim officer’s name, rank, total law enforcement experience, date of birth, gender, race, height, weight, and circumstances surrounding the death or assault of the officer. Offender data collected includes name, date of birth, gender, race, height, weight, place of birth, current or known residence, FBI number, and criminal history. Upon receipt of the completed Form 1-701, the information is stored within an electronic database utilizing Access software.
FBI PRIVACY THRESHOLD ANALYSIS (PTA)

NAME OF SYSTEM: Law Enforcement Officers Killed and Assaulted

If an officer has been feloniously killed, the International Justice and Public Safety Information Sharing Network (Nlets) is utilized to transmit an All-Points Bulletin message providing preliminary information concerning the circumstances surrounding the felonious death of an officer. These Nlets messages are also stored in the electronic LEOKA database.

The above-mentioned survivor information is maintained by the LEOKA program’s staff in paper-based format; however, it is not currently stored in the electronic LEOKA database. The victim officer’s agency information; victim’s name, age, and law enforcement experience; survivors’ names, ages of children, and addresses; and a brief description of the incident are provided to the White House for condolence purposes.

a. If the system is solely related to internal government operations please provide a brief explanation of the quantity and type of employee/contractor information:

   Not applicable.

2. Purpose for collecting the information and how it will be used:

   Officer killed information is collected to report the number of incidents and to help law enforcement/data users better understand the situations which lead to officer deaths. Also, contributing law enforcement agencies report their officer assaults, identifying the instances that resulted in injuries. In addition, contributing law enforcement agencies provide expanded data on those officers who sustained personal injury from a firearm or a knife/other cutting instrument. Officers killed and assaulted data are collected and annually published in an effort to assist law enforcement training programs and ultimately improve officer safety. However, these publications do not contain personally identifiable information.

3. The system’s structure (including components/subsystems):

   The system is an MS Access Division [Redacted]
   The data is maintained at the CJIS

4. Means of accessing the system and transmitting information to and from the system:

   The LEOKA database system is accessed through FBINET utilizing a username and password. Information supplied on Form 1-701 is entered into the system by the LEOKA program’s staff.
