(U) The statutory authority for conducting this acquisition is 41 U.S.C. 253 (c)(6). The regulatory authority is FAR 6.302-6(a)(2). 6. **DESCRIPTION OF EFFORTS MADE TO ENSURE THAT OFFERS WERE SOLICITED FROM AS MANY POTENTIAL SOURCES AS WAS PRACTICABLE**

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement. Further, FAR 5.202(a)(1), provides Contracting Officer authority to not publish a procurement action when “the synopsis cannot be worded to preclude disclosure of an agency’s needs and such disclosure would compromise the national security”, (e.g., would result in disclosure of classified information). This procurement is not being publicized in the Federal Business Opportunities (FedBizOpps), or any other periodicals because to do so would

9. ANY OTHER FACTS SUPPORTING THE USE OF OTHER THAN FULL AND OPEN COMPETITION

(U) ______________________________________________________________________ See paragraph (5) above for facts supporting the use of other then full and open competition.

10. A LISTING OF SOURCES, IF ANY, THAT EXPRESSED IN WRITING AN INTEREST IN THE ACQUISITION

(U) Since the procurement was not advertised pursuant to FAR 5.202(a)(1), no other sources were given the opportunity to express written or oral interest in this procurement.

11. A STATEMENT OF THE ACTIONS, IF ANY, THE AGENCY MAY TAKE TO REMOVE OR OVERCOME ANY BARRIERS TO COMPETITION BEFORE ANY SUBSEQUENT ACQUISITION FOR THE SUPPLIES OR SERVICES REQUIRED

(U) The FBI will evaluate future procurement actions to determine whether full and open competition is appropriate an in the best interests of the government.

12. TECHNICAL REPRESENTATIVE CERTIFICATION

(U) Based on the above findings, it is hereby determined, within the meaning of 41 U.S.C. 253(c)(6) and FAR 6.302-6, full and open competition need not be provided for when the disclosure of the agency's needs would compromise national security, unless the agency is permitted to limit the number of sources from which it solicits bids or proposals.

ADDENDUM TO FBI REQUISITION

Competing as an action will allow for faster delivery of. Additionally, it will reduce the burden that placed on the finance division from processing contracting actions.

The POC for this addendum is ET.

10.0 Evaluation Factors for Award

Award will be made to the offeror whose proposal, conforming to this solicitation, is determined to be the best overall value to the Government. Technical factors are more important than price. Past performance shall be used as a major part of evaluating an offeror's past performance.

10.1 Technical Factors

10.2 Approach

10.1.1 Overall Understanding/Approach

The Offeror shall provide a concise summary of its understanding of the requirement, and describe its general approach to complete tasks specified in paragraphs 3.1 through 3.4 of Section C. This summary shall be evaluated to determine the offeror's grasp of requirements and the comprehensiveness and viability of its approach.

10.2.1 Key Personnel

The Government shall evaluate the quality of the offeror's Key Personnel in terms of their qualifications, experience, and training, especially with regard to the nature of work described in this solicitation.

10.3.1 Past Performance

The Offeror shall describe its past performance on no more than three (3) similar contracts and subcontracts (no more than 2 pages each) held within the last three (3) years. Past performance evaluation questionnaires will be submitted to previous/current clients (Contracting Officer Technical Representative and/or Contracting Officer) and forwarded the Government Contracting Officer for this solicitation.

The Government shall evaluate the quality of the offeror's past performance. Examples of technically relevant performance in support of Law Enforcement activities will receive relatively more credit than non-Law Enforcement performance. The assessment of past performance will be used in two ways.

First, the assessment of the offeror's past performance will be used as one means of evaluating the credibility of the offeror's technical and management proposal volumes. A record of marginal or unacceptable past performance may be considered an indication that the promises made by the offeror are less than reliable. Such an indication may be reflected in the Government's overall assessment of the offeror's proposal. However, a
record of acceptable—or even excellent—past performance will not result in a favorable assessment of an otherwise unacceptable technical or management proposal.

Second, the assessment of the offeror's past performance will be used as one means of evaluating the relative capability of the offeror and the other competitors. Thus, an offeror with an exceptional record of past performance may receive a more favorable evaluation than another whose record is acceptable, even though both may have acceptable technical and business proposals.

In investigating an offeror's past performance, the Government will consider information in the offeror's proposal and information obtained from other sources, including past and present customers and their employees; other Government agencies, including state and local agencies; consumer protection organizations and better business bureaus; former subcontractors; and others.

Evaluation of past performance will be a subjective assessment based on a consideration of all relevant facts and circumstances. It will not be based on absolute standards of acceptable performance. The Government is seeking to determine whether the offeror has consistently demonstrated a commitment to customer satisfaction and timely delivery of quality goods and services at fair and reasonable prices. This is a matter of judgment. Offerors in the competitive range will be given an opportunity to address especially unfavorable reports of past performance, and the offeror's response—or lack thereof—will be taken into consideration.

The Government's conclusions about the overall quality of the offeror's past performance will be highly influential in determining the relative merits of the offeror's proposal and in selecting the offeror whose proposal is considered most advantageous to the Government.

By past performance, the Government means the offeror's adherence to contract schedules, including the administrative aspects of performance; the offeror's control of costs, including costs incurred for changed work, the offeror's reputation for reasonable and cooperative behavior and commitment to customer satisfaction; and, generally, the offeror's business-like concern for the interests of the customer.

10.4.1 Management Approach

The Government shall evaluate the quality of the offeror's Management Approach. The Management Approach will be evaluated in terms of the offeror's ability to direct and control all aspects of performance described in the Statement of Work.

10.5.1 Price

The evaluation of price will be based on fair and adequate price competition. The Government reserves the right to award to other than the lowest proposed price after consideration of all evaluation factors.

The Government will not include proposed prompt payment discounts in its consideration.

11.0 Evaluation of Options
Except when it is determined in accordance with FAR 17.206(b) not to be in the Government's best interests, the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirements. Evaluation of options will not obligate the Government to exercise the options(s).

12.0 Evaluation Criteria

Proposals will be evaluated to determine the offer(s) most advantageous to the Government. The responses from project/contract references, as well as any other information contained in their proposal and/or available from outside sources, will be utilized in the source selection decision to determine the most advantageous offer (best value) to the Government.

13.0 Evaluation Factors For Award

Selection of an offeror for award will be based on an evaluation of proposals in the following areas: Technical Factors and Price. The Technical Factors, taken together, are more important than Price.

Among the Technical Factors, Key Personnel and Past Performance are the most important factors and have equal weight.

The remaining Technical Factors, Technical Approach and Management Approach are of equal importance.

For each Technical Factor, except Past Performance, the evaluation will consist of an assessment of the degree to which the services offered in the proposal provide added value, added capability, and/or reduced risk. In addition, the evaluation will identify the strengths, weaknesses, and risks in each offeror's proposal based on the evaluation factors identified herein.

Offerors that, because of a lack of relevant past performance, are unable to provide the project/contract references requested will receive a Neutral rating for that item.

Although price is considered secondary to technical capabilities, it will be a significant criterion for award as part of an integrated assessment with the Technical Factors, which are intended to identify those Offerors with the knowledge, expertise, experience, and the resources to fulfill the requirements of the contract.

**Step 6** This section is intended to ensure that you have properly planned for all the enterprise architecture (EA), budget and life cycle management costs regarding your acquisition. In other words, have you planned: a. How the product will work within, or the impact on, the FBI's EA? b. When acquiring services, will the Contractor provide the hardware or software product(s) and how those products will impact the FBI's EA? c. How will the acquired product(s) be integrated into an IT system or project as listed under the six (6) IT categories from Step 4, and the name of the system or project. Integrating the product(s) requires accurate planning.

**Step 7** This section is intended to ensure that you have completed all the necessary contractual documents for the method of acquisition you are using. If you are unsure or unaware of whether any of these documents are required, please contact either CFO/ CIO for assistance.

**Step 8** Self-explanatory.

**Step 9** This section is mandatory and is intended to ensure that the proper level of authority has been obtained in order to process this acquisition. You are only responsible to obtain the Customer Signature and Division Signature. The Customer Signature should reflect the actual recipient of the IT product(s), in case the Requestor filling out this form is different. The Division Signature should reflect that the person responsible for the acquisition is the actual recipient of the IT product(s).
