Questions?

DAC Tenets

- The draft tenets were developed by a subset of the DAC at the request of the full DAC committee
- The tenets provide *shared vision* of a preferred future state that we are working towards, and they help us validate that we are nearing that vision
- The tenets are to be taken as a whole
- We seek consensus from the DAC to adopt the tenets as foundational assumptions and guiding principles that the DAC believes should drive all our work going forward
- They are not recommendations for the FAA
