Here's an addendum to the email I sent yesterday which includes a [redacted] task (Sub Task 3) that may be of interest. We can fit this into the prop by the Sept 6 delivery date.

Click to view all folders

- [redacted]
- move
- Manage Folders...

- Sub Task 1, [redacted]
- Scope: Build the [redacted] to support [redacted]
 - No formal reviews; monthly review to provide status.
 - No formal acceptance testing. Analysis / demonstration at the end of the program to prove the [redacted]
 - Final report documenting the results of the results and analysis and demonstration

- Sub Task 2, [redacted]
- Scope: Demonstrate [redacted] with the next generation [redacted]
 - We will provide a technical write up of the proposed effort but not a price. We will provide a ROM at a later date. Give me an additional week or so to get that to you.

- Sub Task 3, [redacted]
- Scope: Provide a proof of concept implementation of [redacted] This is the first step in implementing [redacted] We already have a concept that we've researched [redacted] but have not been able to try.
 - Will require [redacted] to demonstrate the concept.
 - No formal reviews; monthly review to provide status.
 - No formal acceptance testing. Demonstration at the end of the effort.
 - Final report documenting the results of the research and demonstration.

[redacted]

To do what you're asking is going to take much more time than we have to reply to the RFP and I know you're on a tight schedule with year end funds. What we had originally ROM'd for [redacted] at [redacted] was to [redacted] and then demonstrate it would work in the [redacted] [redacted] There was no PDR/CDR or any kind of test program. There was no [redacted]

CELL/OTD 030280

[redacted]

For this RFP, we would like to propose the following:

- We provide you with a prop to do essentially what we told [redacted] we were going to do when we gave him the ROM. Essentially we propose doing subtask 1 with a small [redacted] effort to [redacted] [redacted] is a small adder to the original ROM but would be useful for providing a demo of the [redacted] capabilities. [redacted] would meet all the requirements you call out for Sub Task 1 in the RFP. The only difference is we would not have formal design reviews and no acceptance test. We would have monthly reviews to provide progress and details of the design as it matures. The end product of this subtask would be analysis / demonstration that the [redacted] meets all the requirements necessary to support [redacted] for all specified [redacted]
- For Sub Task 2 we propose to provide you a ROM on the cost to implement [redacted] for all [redacted] listed in the RFP. We're probably going to need more time to get this ROM together as there is a good bit of [redacted] tasking to be considered.

b7E

Hopefully this provides you what you need to award work within the range of the original ROM while also providing bogies for the [redacted] work should you wish to fund [redacted]

Hi [redacted]

Just to follow up - we have a confirmation from all parties concerned. We would like to review a proposal with work packages or the requirements broken down into smaller portions for our review and evaluation.

Thank you for your assistance,

[redacted]

Hi [redacted]

Per our conversation a moment ago: Please divide the proposal into work packages for our review and evaluation. Should funding become an issue this will enable us to prioritize work. As I said, we're trying to get you a more detailed answer; however in light of your upcoming meeting in 30 minutes I wanted to provide some guidance.

CELL/OTD 030221

Thanks.

Subject: [redacted] Enhancement Task Order

[redacted]

We've received the RFP for the new task order. After the first read, this looks like more than [redacted] worth of work. We knew that [redacted] was anticipating funding something like this task order and thought he had way less than [redacted]

b3

b7E

I need to know if we're totally off base in our initial assessment of the scope of work for this task order. I would hate to go through all the work to propose something that is way beyond your expectations.
