[REDACTED]

Diane didn't tell me the number of CD's. When we were at NWA, they said that they gave the FBI one year's data on 6000 CD's. That would suggest that 3 months' data would fill 1500 CD's. However, the sample CD's that they gave us appear to contain one full days' data (Nov 1) on 3 CD's. Which would suggest that 90 days' data would fill 270 CD's. We'll find out next week.
